# Planting Peonies

**A PEONY PLANT** often becomes a family favorite for generations; therefore, buy only the best varieties and top-quality roots. We specialize in growing roots which are true-to-name and in a healthy condition.

**WHERE TO PLANT**—Plant in average soil, with good drainage and at least half-time sunlight, in beds or rows by themselves, here and there in perennial borders or shrubbery foreground, along walks, etc.

**WHEN TO PLANT**—In September and until the ground freezes. Orders already placed are mailed directly to the customer unless otherwise designated.

**HOW DEEP SHOULD THEY BE PLANTED**—The buds on the crown of the plant should be two inches below the surface of the soil. In setting the root, be sure the soil in the bottom of the hole has been well tamped down so the plant will not sink below this level.

**OUR OFFER FOR THIS YEAR**—We are offering approximately 200 varieties of Choice Peonies for fall season planting. All have been carefully selected over the past years. We vouch for their healthy condition as they are divisions from young field grown stock. All divisions have three to five eyes or more.

**FOR BEST SELECTION**—Choose during blooming time, usually the first two weeks in June, when blossoms are picked from the field and set up in the packing shed for easy selection. Display may be seen in the packing shed formerly used by The Leightons (see directional map on the back page).

Inquiries should be addressed to Rte. 2, Box 2148-E, Edmonds, Washington.

## JOIN THE AMERICAN PEONY SOCIETY

Every Peony lover should join the American Peony Society. Each member receives about four valuable booklets on the Peony each year. These bulletins contain valuable and interesting information. Articles are written by Peony enthusiasts from all sections of the country. A complete report of each National Peony Show is given in one of the numbers. You will keep up to date on the progress of the Peony by becoming a member.

Membership is \$5.00 per year. You may add this amount to any order you send us and we will take care of your membership. This is an investment you will not regret. Otherwise, write directly to George W. Peyton, Rapidan, Virginia.

*Single Type*

Somewhat like the Japanese Peony except center has a cushion of yellow stamens instead of petaloids. The singles open three to five days earlier than the doubles or Japanese types. As a class they are very graceful plants, holding their blooms well off the ground without support and offering very handsome subjects for flower arrangements as well as garden effect.

## SINGLE TYPE

<b>SAMUEL HILL</b> —Bright pink, tall.....	<b>2.00</b>
<b>SHY MAID</b> —Light peach pink.....	<b>2.00</b>

*Japanese Type*

This type of Peony is very graceful in growth and quite different in type of flower. The flowers are single or semi-double with wide flaring petals of exquisite coloring and texture. The centers are usually a more or less compact mass of tiny petaloids, usually a color contrasting with the main petal color. Very charming color effects are found among them. Ideal for flower arrangements.
